TITLE : PACKAGE BODY WITH
GAS-RELEASING AGENT WRAPPED
IN IT

ABSTRACT : PROBLEM TO BE SOLVED: To provide a package body with a gas-releasing agent wrapped in it which is stable in preservation, convenient to handle, easy to store and transport, allows the direct use of the package body with the gas-releasing agent wrapped in it, and enables a workhours reduction and energy saving.

SOLUTION: A package body 1 is obtained by wrapping a gas-releasing agent comprising a composition in the form of a solid, which contains at least carbonate and/or hydrogencarbonate, water-soluble solid acid, and active constituent, with a wrapping material such as water-soluble polymeric film 2, and has at least one venting hole. When put in water it floats, and when the wrapping material dissolves in the water, the gas-releasing agent 5 sinks and gradually dissolves while releasing gas, thus diffusing the active constituent.
